TYREFILL

PRODUCT RANGE

The Rely system consists of two liquid components (A & B) which are injected into the tyre through the valve system. Our specially designed Lincoln pumping unit ensures the correct mix ratio and final pressurisation.

The Advantages

- No Punctures !
- Reduces down-time
- Lowers the vehicles centre of gravity
- Increases driver comfort and confidence
- Eliminates the need for tyre pressure checks
- Provides greater vehicle stability and safety
- Aids constant tyre footprint
- Operates in extreme temperature environments
